

# Cornerstone Deep Integration Overview Guide

## Deep Integration Functionality

**Authentication:** SAML SSO Identity Provider

**Reporting:** xAPI

**Content Discovery:** Automated Catalog Sync (All Languages)

## Integration Overview

### Single Sign On

During the initial configuration, LinkedIn Learning and Cornerstone can be configured to establish a secure SAML single sign-on (SSO) connection to ensure seamless and secure access to content. SSO authentication reduces friction for users and administrators by eliminating the need for manual user registration. SSO ensures learners spend more of their time watching content and less of their time trying to remember usernames and passwords.

### Automated Content Catalog Sync

The LinkedIn Learning library contains over 12,000 courses, with 20-30 courses added per week at no extra cost. At that rate, it would take LMS admins a considerable amount of time to repeatedly upload new content from LinkedIn Learning manually.

Cornerstone automates this process using the LinkedIn Learning content APIs, so LMS admins do not have to manually upload new content packages at regular intervals. After initial setup, Cornerstone will dynamically refresh the content library on an automated basis. This ensures new LinkedIn Learning content is available to learners within 24 hours of release. All content titles and descriptions are aggregated and indexed to accommodate keyword searches and support efficient discoverability.

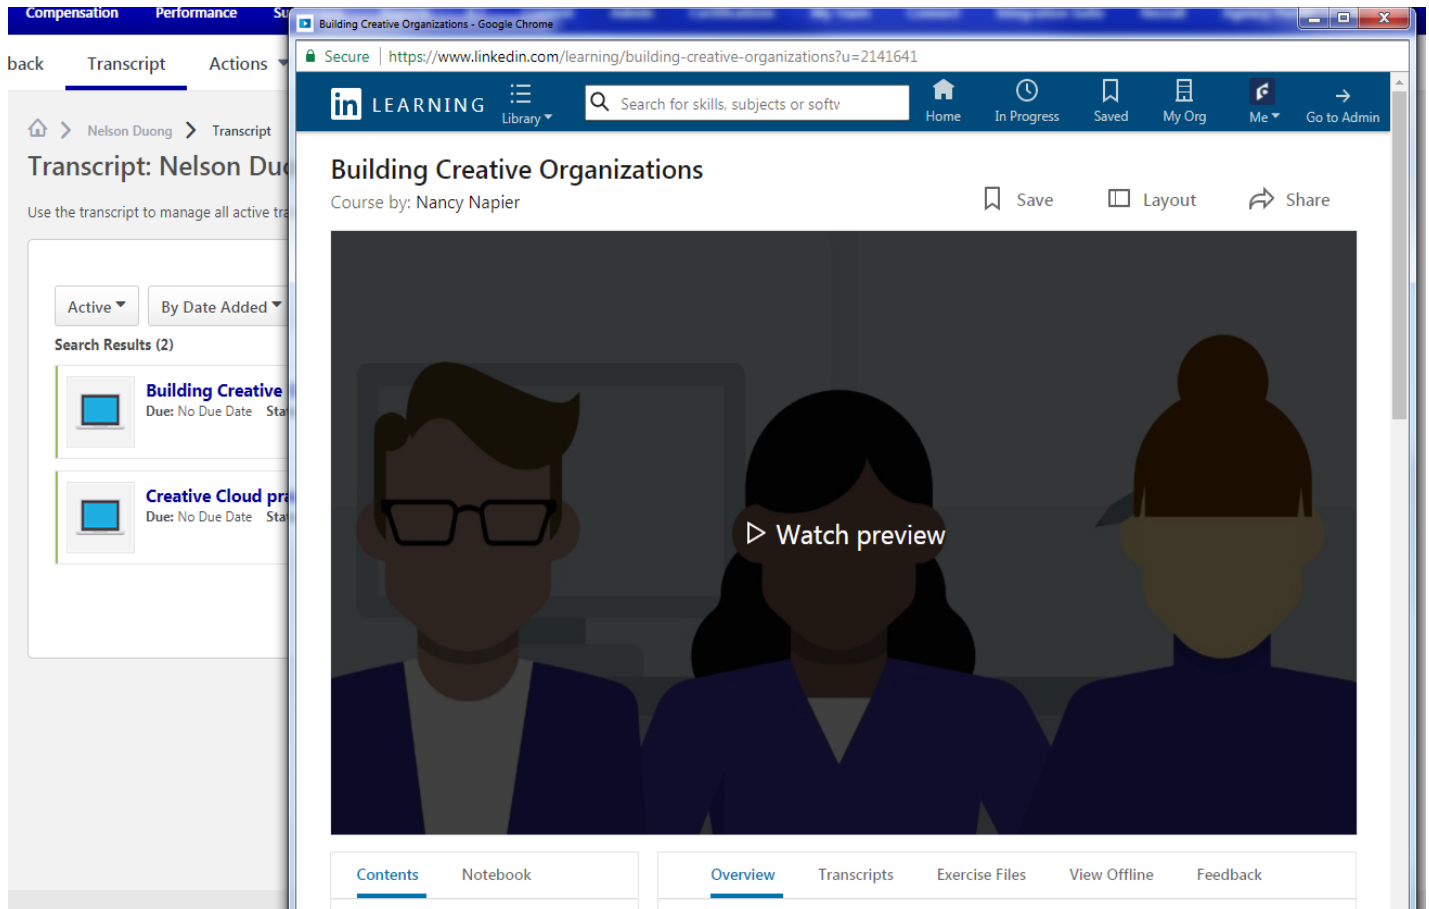

### Reporting

Traditional activity tracking standards, like SCORM & AICC, requires learners to discover and launch content from your LMS, and can make it challenging to capture learner activities that take place outside of the LMS.

This integration uses xAPI, a secure & modern approach to communicating learner activity between learning platforms. Unlike AICC & SCORM, this implementation allows LinkedIn Learning to communicate completions back to Cornerstone regardless of how & where the content is launched. Learners can launch content from Cornerstone, or they can view courses directly on LinkedIn Learning (desktop or mobile). Either way course completions will be communicated back to the LMS.

## Screenshots Content Launch

When learners launch content from Cornerstone they will be seamlessly authenticated into LinkedIn

## Catalog Search

LinkedIn Learning content can be added into catalogs so learners & admins can search, discover & preview content directly in Cornerstone.
