

# Everwise Deep Integration Configuration Guide

## Everwise Deep Integration Functionality

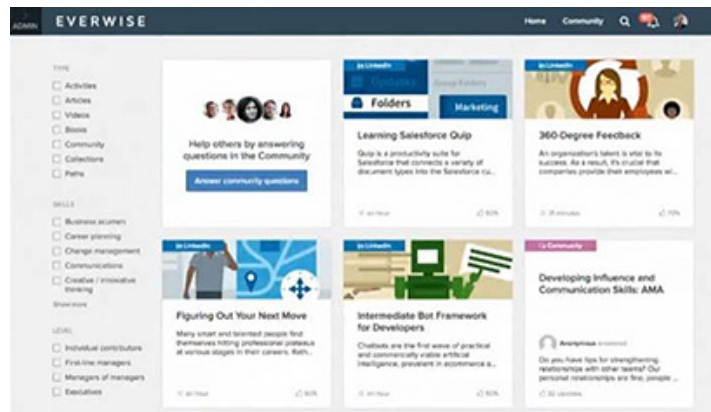

**Content Discovery:** Automated Catalog Sync (English Only)

**Reporting:** N/A

## Integration Overview

### Automated Content Catalog Sync

The LinkedIn Learning library contains thousands of courses. Courses are added at a rate of 25-30 courses per week at no extra cost. Traditionally, the administrator of a content discovery platform manually uploads new content on a regular interval. However, the Everwise deep integration uses LinkedIn Learning APIs to dynamically refresh the content library on a daily basis.

This ensures new LinkedIn Learning content is available within 24 hours of its release. All content titles and descriptions are aggregated and indexed to accommodate keyword searches and support efficient discoverability. Everwise supports automatic syncing of English Only content libraries.

## Configuration

### Enabling SAML SSO

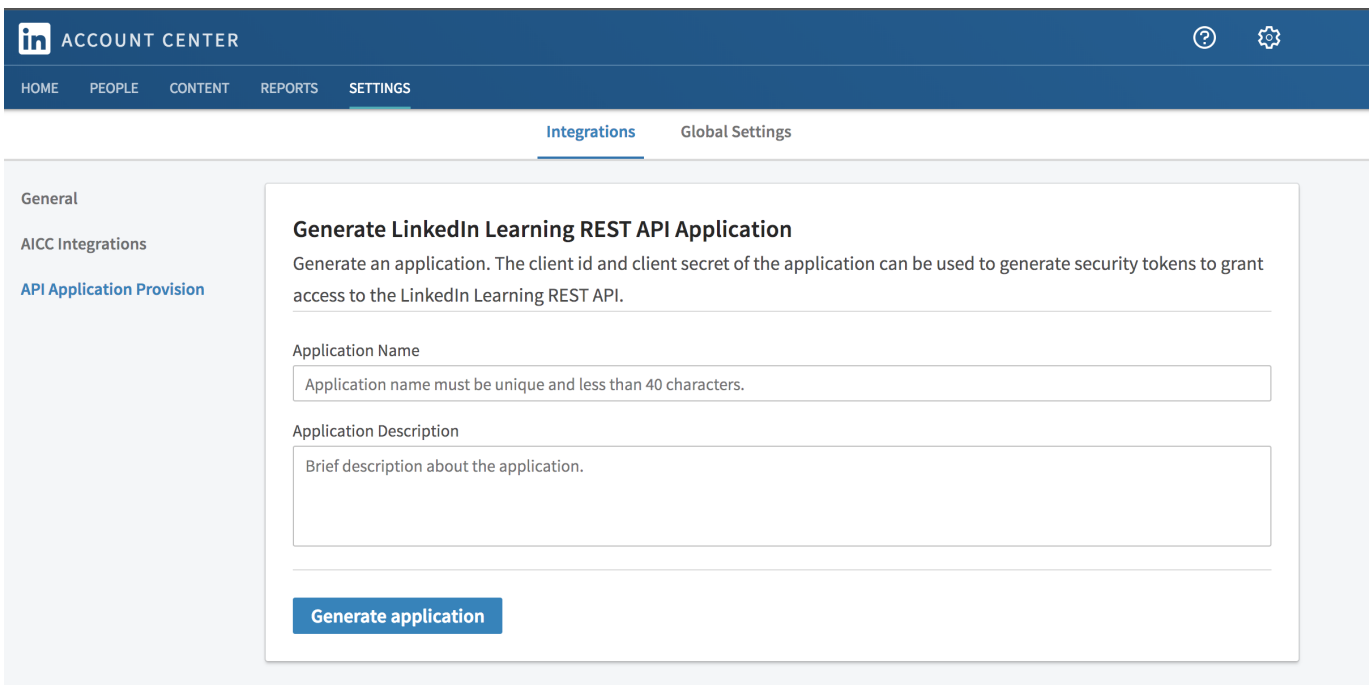

SAML SSO is recommended for all enterprise learning platform integrations. SSO authentication can be configured in your LinkedIn Learning Admin settings. Most organizations have a centrally managed identity management solution like Azure AD, Okta or AD FS which can be configured to authenticate users into enterprise applications like LinkedIn Learning.

To configure SAML SSO with your identity management solution, share our [SAML SSO Admin Guide](#) with your organization's IT team.

## Provision API Keys for Content Catalog Sync

In order for Everwise to sync LinkedIn Learning catalog metadata, API keys must be provisioned in LinkedIn Learning Admin settings.

1. From your admin settings, select **settings** from the navigation header.
2. From the side navigation menu, select **API Application Provision**.
3. Provide the name of your learning platform for example Degreed, Absorb, Pathgather, as the application name.
4. Provide a short description of the integration use case in the application description field. For example, "Everwise content catalog sync".
5. Select the **Generate application** button.

The screenshot shows the LinkedIn Account Center interface. The top navigation bar includes the LinkedIn logo, 'ACCOUNT CENTER', and icons for help and settings. Below this is a secondary navigation bar with 'HOME', 'PEOPLE', 'CONTENT', 'REPORTS', and 'SETTINGS'. Under 'SETTINGS', there are two sub-sections: 'Integrations' (which is active) and 'Global Settings'. On the left side, there is a sidebar menu with 'General', 'AICC Integrations', and 'API Application Provision' (which is selected). The main content area is titled 'Generate LinkedIn Learning REST API Application'. It contains a text box for 'Application Name' with a note that the name must be unique and less than 40 characters. Below that is a text box for 'Application Description' with a note to provide a brief description. At the bottom of the form is a blue button labeled 'Generate application'.

## Everwise Configuration

To complete the configuration with Everwise, you will need the following information:

- Client ID
- Client Secret
- LinkedIn Learning Languages Purchased (Only Absorb & Degreed)
- LinkedIn Learning Account ID (Only Degreed)

Once you've gathered the required information, follow Everwise's configuration instructions set forth [here](#).
