

Provision API Keys for Content Catalog Sync

In order for Pathgather to sync LinkedIn Learning catalog metadata, API keys must be provisioned in LinkedIn Learning admin settings.

1. From your admin settings, select **settings** from the navigation header.
2. From the side navigation menu, select **API Application Provision**.
3. Provide the name of your learning platform for example Degreed, Absorb, Pathgather, as the application name.
4. Provide a short description of the integration use case in the application description field. For example, “Pathgather content catalog sync”.
5. Select the **Generate application** button.

The screenshot shows the LinkedIn Account Center interface. The top navigation bar includes 'ACCOUNT CENTER' and icons for help and settings. Below this is a secondary navigation bar with 'HOME', 'PEOPLE', 'CONTENT', 'REPORTS', and 'SETTINGS'. The 'SETTINGS' menu is expanded to show 'Integrations' and 'Global Settings'. On the left sidebar, 'API Application Provision' is selected. The main content area displays the 'Generate LinkedIn Learning REST API Application' form. The form includes a title, a description of the application's purpose, two input fields for 'Application Name' and 'Application Description', and a 'Generate application' button.

Generate LinkedIn Learning REST API Application

Generate an application. The client id and client secret of the application can be used to generate security tokens to grant access to the LinkedIn Learning REST API.

Application Name

Application name must be unique and less than 40 characters.

Application Description

Brief description about the application.

Generate application

Pathgather Configuration

To complete the configuration with Pathgather, you will need the following information:

- Client ID
- Client Secret
- LinkedIn Learning Languages Purchased (Only Absorb & Degreed)
- LinkedIn Learning Account ID (Only Degreed)

Once you've gathered the required information, follow Pathgather's configuration instructions set forth [here](#).
