

Knowledge Anywhere Deep Integration Configuration Guide

Partner Details

Authentication: SAML SSO Identity Provider

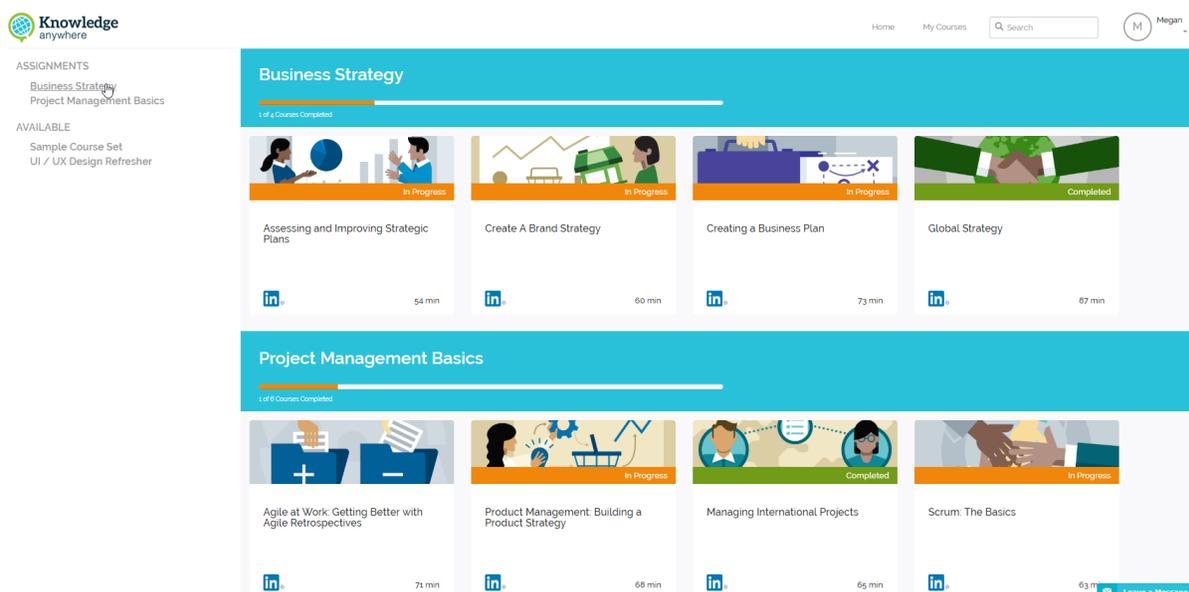

Content Discovery: Automated Catalog Sync

Integration Overview

Single Sign-On

During the initial configuration, LinkedIn Learning can be configured to establish a secure SAML single sign-on (SSO) connection to ensure seamless and secure access to content. SSO authentication reduces friction for users and administrators by eliminating the need for manual user registration. SSO ensures learners spend more of their time watching content and less of their time trying to remember usernames and passwords.

Automated Content Catalog Sync The LinkedIn Learning library contains thousands of courses. Courses are added at a rate of 20–30 courses per week at no extra cost. Traditionally, the administrator of an LMS manually uploads new content at regular interval. However, a deep integration with LinkedIn Learning APIs allows for a dynamic refresh of the content library on a daily basis. This ensures new LinkedIn Learning content is available within 24 hours of its release. All content titles and descriptions are aggregated and indexed to accommodate keyword searches and support efficient discoverability.

The screenshot displays the LinkedIn Learning user interface. At the top left is the "Knowledge anywhere" logo. The top right navigation bar includes "Home", "My Courses", a search bar, and a user profile icon for "Megan".

The main content area is divided into two sections:

- Business Strategy:** A progress bar shows "1 of 4 Courses Completed". Below it are four course cards:
 - "Assessing and Improving Strategic Plans" (54 min) - In Progress
 - "Create A Brand Strategy" (60 min) - In Progress
 - "Creating a Business Plan" (73 min) - In Progress
 - "Global Strategy" (87 min) - Completed
- Project Management Basics:** A progress bar shows "1 of 8 Courses Completed". Below it are four course cards:
 - "Agile at Work: Getting Better with Agile Retrospectives" (71 min) - In Progress
 - "Product Management: Building a Product Strategy" (68 min) - In Progress
 - "Managing International Projects" (65 min) - Completed
 - "Scrum: The Basics" (63 min) - In Progress

At the bottom right, there is a "Leave a Message" button.

Configuration

Enabling SAML SSO

SAML SSO is recommended for all enterprise learning platform integrations. SSO authentication can be configured in your LinkedIn Learning Admin settings.

To enable SAML SSO with Knowledge Anywhere, contact their customer support team for assistance in generating identity provider metadata.

For more information about enabling SAML SSO, review our [SAML SSO Admin Guide](#)

Provision API Keys for Content Catalog Sync

In order for Knowledge Anywhere to sync LinkedIn Learning catalog metadata, API keys must be provisioned in LinkedIn Learning admin settings.

1. From your admin settings, select **settings** from the navigation header.
2. From the side navigation menu, select **API Application Provision**.
3. Provide the name of your learning platform for example "Knowledge Anywhere LMS" as the application name.
4. Provide a short description of the integration use case in the application description field. For example, "Knowledge Anywhere content catalog sync".
5. Select the **Generate application** button.

The screenshot displays the LinkedIn Account Center Admin interface. At the top, the 'ACCOUNT CENTER' header includes the LinkedIn logo, navigation links for HOME, PEOPLE, CONTENT, REPORTS, and SETTINGS (which is highlighted), and utility icons for help and settings. Below the header, the 'Integrations' section is active, showing 'Global Settings' and 'Integrations' tabs. The 'API Application Provision' page is shown, featuring a sidebar with 'General', 'AICC Integrations', and 'API Application Provision' (selected). The main content area is titled 'Generate LinkedIn Learning REST API Application' and contains instructions: 'Generate an application. The client id and client secret of the application can be used to generate security tokens to grant access to the LinkedIn Learning REST API.' There are two input fields: 'Application Name' with a note 'Application name must be unique and less than 40 characters.' and 'Application Description' with a note 'Brief description about the application.' A blue 'Generate application' button is located at the bottom of the form.

Knowledge Anywhere Configuration

To complete the configuration with Knowledge Anywhere, you will need the following information:

- Client ID
- Client Secret

Once you've gathered the required information, follow Knowledge Anywhere's configuration instructions set forth [here](#).
